

Brainstorming & Idea Prioritization Template

Date	15 July 2026
Team ID	SWTID-2026-1483
Project Name	Credit card Approval Prediction
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Nakarikanti Tanmai Sri Viswa Gayathri	Develop a machine learning model to predict whether a credit card application will be approved based on customer details and credit history.	Machine Learning	SWTID-2026-1483
2	Yogendra Kireeti Nadiminti	Build a Flask web application that allows users to enter applicant details and instantly view the credit card approval prediction.	Web Application Development	SWTID-2026-1483
3	Lakshmi Mounika Oruganti	Perform data preprocessing, feature selection, and compare different machine learning algorithms to improve prediction accuracy.	Data Analytics & Machine Learning	SWTID-2026-1483
4	Nakkala Om Prakash	Test the application, improve the user interface, and display prediction results with model performance and accuracy.	Testing, UI & Deployment	SWTID-2026-1483

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Brainstorming & Idea Prioritization Template

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Credit Card Approval Prediction using Machine Learning (Random Forest Classifier with Flask Deployment)	High	High	High	YES
2	Loan Approval Prediction using Machine Learning	Medium	High	Medium	NO
3	Customer Churn Prediction using Machine Learning	Medium	Medium	Low	NO
